# Sanjeevan Thangaraj

**Phone:** 9502965479  **Email:** sanjeevan1122003@gmail.com

## SUMMARY

Dedicated Full-Stack developer with over two years of experience in front-end development and an additional year focused on backend functionality. Proficient in HTML, CSS, JavaScript, Python, and SQL. Enthusiastic about building user-friendly applications that balance aesthetic appeal with functional depth.

## EDUCATION

**Priyadharshini Engineering College**                                    **Aug 2021 - May 2025**
Bachelor of Technology                                                          Grade: 8.3 CGPA

**Narayana Junior College**                                                    **Jun 2019 - May 2021**
Intermediate (MPC)                                                             Grade: 785 Marks

**Ratnam High School**                                                          **Jun 2017 - May 2019**
Secondary School Certificate (SSC)                                        Grade: 8.3 CGPA

## EXPERIENCE

**Freelance**                                                                          **Jan 2021 - Present**
Front-End Developer
- Developed and maintained responsive websites using HTML, CSS, and JavaScript.
- Collaborated with clients to understand requirements and deliver user-centric solutions.
- Optimized website performance and ensured cross-browser compatibility.

**Freelance**                                                                          **Jan 2022 - Present**
Backend Developer
- Developed backend functionality using Python and JavaScript.
- Managed user credentials and ensured secure data handling.
- Integrated APIs and handled server-side logic for web applications.

## PROJECTS

**AI Chatbot**                                                                        **Jan 2023 - Present**
Personal
- Developed an AI chatbot using Python, focusing on natural language processing and AI-driven automation.
- Implemented machine learning concepts to create responsive, user-oriented solutions.
- Enhanced user experience by integrating intelligent and adaptive interactions.

**Expense Tracker**                                                                **Sep 2022 - Dec 2022**
Personal
- Created an expense tracker application using Python to manage and track personal finances.
- Implemented data storage and retrieval using SQL for efficient data management.
- Developed a user-friendly interface with HTML, CSS, and JavaScript.

**Resume Maker Website**                                                        **Jun 2022 - Aug 2022**
Personal
- Designed and developed a resume maker website using HTML, CSS, Bootstrap, and JavaScript.
- Implemented responsive design principles to ensure compatibility across devices.
- Enhanced user experience by integrating interactive features and dynamic form generation.

## ACHIEVEMENTS

- Developed an AI chatbot using Python, focusing on natural language processing and AI-driven automation.
- Created an expense tracker application using Python to manage and track personal finances.
- Designed and developed a resume maker website using HTML, CSS, Bootstrap, and JavaScript.

## CERTIFICATIONS

**Power BI Certification**
**AWS Certification**

## SKILLS

- **Programming Languages:** HTML, CSS, JavaScript, Python, SQL
- **Frontend Frameworks and Libraries:** Bootstrap
- **Backend Development:** Python, JavaScript
- **Database Management:** SQL
- **Data Visualization:** Power BI
- **Cloud and Web Hosting:** AWS S3, CloudFront, Route 53
- **Soft Skills:** Adaptability, Teamwork, Creative Thinking, Good Communication, Time Management
